

K-12 Crisis Communication Platform

The Safest Schools Rely on Ruvna

Achieve Complete Accountability

Strengthen vital communication during emergencies and drills

Account For Students

Follow along live as teachers use Ruvna to take attendance during a crisis. Any faculty member can check-in any student, helping you achieve 100% student accountability.

Interact with Faculty

Send critical information to your entire team in an instant. Empower your entire staff to communicate seamlessly — no more walkie-talkie troubles.

Support Student Needs

Dispatch help immediately when any student requires attention. Keep law enforcement, first responders, and administration up-to-date at all times.

"I count finding [Ruvna] as one of my greatest successes here in the past 20 years."

Celeste M. Checchia, Ph.D
Principal | St. Mary's Elementary

Command Every Possible Situation

Identify who needs attention quickly, safely, and accurately

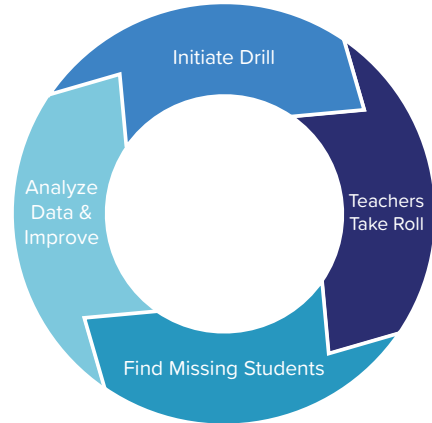

Teachers Take Roll

Administrators See Missing Students

Ruvna replaces paper and clipboard rosters during emergencies and drills.

Single Sign-On

Optimize faculty usage by eliminating the need to remember Ruvna-specific credentials. Utilize your existing Single Sign-On infrastructure within Ruvna with ease.

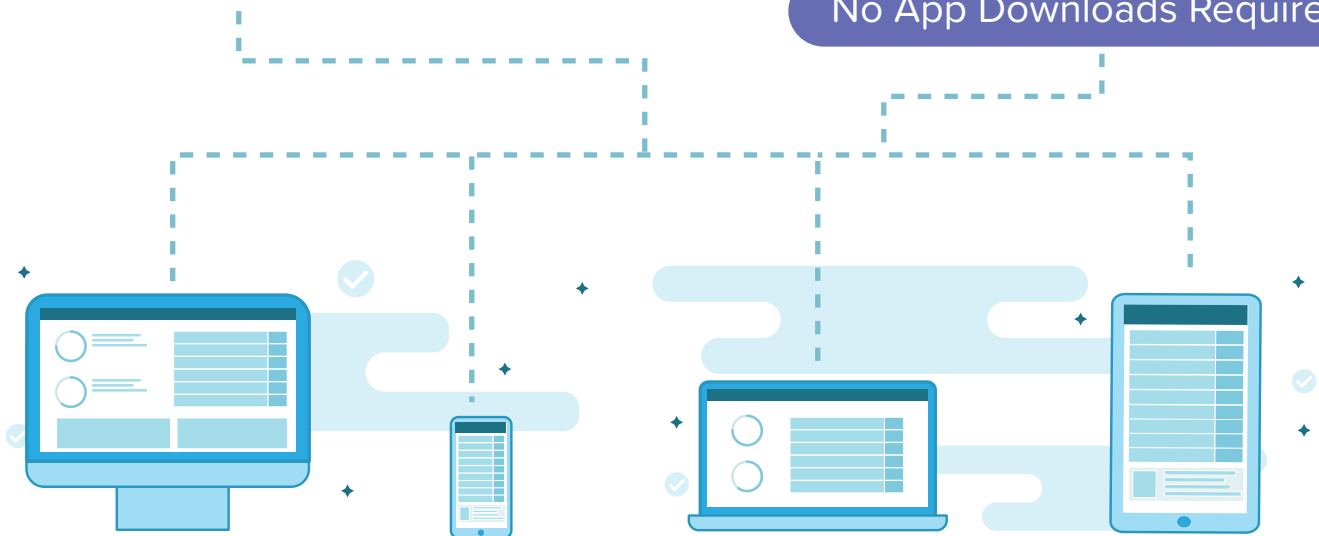

Fluid SIS Integration

Transfer data seamlessly from your Student Information System directly into Ruvna. Never suffer through outdated rosters during a crisis again.

Communicate from Any Device

No App Downloads Required

Frequently Asked Questions

Contact Ruvna for answers to any additional questions

Do users need an app installed to use Ruvna?

Absolutely not! While teachers are free to use our mobile apps, any device that connects to the internet can be used to check in students, no app required.

How do users log in to Ruvna?

Ruvna integrates in with your school's existing authentication infrastructure. Teachers log in with their existing credentials rather than learning new credentials specifically for Ruvna.

What if a student isn't with their teacher?

Without Ruvna, that student's teacher (along with the school) likely wouldn't know where the student is, or even that the student is missing. With Ruvna, if a student is with a different staff member, their teacher will receive a notification letting them know the student is safe. If the student is not with any staff, they will be displayed immediately to administrators and law enforcement to be found.

What if a teacher doesn't have their phone?

Any device that connects to the internet can be used with Ruvna. Any computer, tablet, or cell phone will work. If a teacher doesn't have their device, any other accessible (like a student's phone) is sufficient. In the unlikely event that no one in a class has a device, any other Ruvna user can change their view on their device to become another teacher's roster, and use that for checking students in.

Can I check in staff in addition to students?

Yes! We know when staff members are active in Ruvna, and if they become active during an emergency we check them in as well. Users that do not become active are also displayed to administrators/law enforcement and can be manually checked in.

Who has access to check in students?

You have complete control to grant the right to check in students. Within Ruvna, you decide exactly which users have the ability to check in students, see remaining students, and initiate/end emergencies.

Can family members follow along in Ruvna?

Ruvna is an internal tool for your school and law enforcement. Family members do not have access to Ruvna.

Is Ruvna secure?

Ruvna is extremely secure. As a safety platform, Ruvna takes security very seriously. All traffic is encrypted via HTTPS/SSL. Data is completely isolated between schools and encrypted to prevent tampering. We never share data with 3rd parties. Ever.
